Introduction

The world is currently passing through a challenging period due to the spread of Covid-19. The safety of people across the world is of paramount importance, while ensuring that the epidemic does not infect more and more with each passing day.

CII has taken a proactive position in ensuring that Members adapt to the emerging conditions with minimal impact on businesses, employees and all stakeholders. To help businesses with business continuity, CII interventions extend to multiple areas, including policy advocacy, support services, competitiveness building and information.

Covid -19 has brought the immediate pressing need for triaging, ICU techs, Infection control, IVDs and PoC and online consultation, tool for identifying high-risk groups and hotspots in the community, robotics and workflow optimization, supply chain management and care coordination between the institution. These days we witness widespread recognition that healthcare technology is critically important and handling dozens of inquiries daily.

It is with this background; CII has developed this Critical Care & Pandemic Response Catalogue; it highlights much needed techs that are able to demonstrate realistic and significant impact.

Through this catalogue we bring to you the capabilities of Indian medical technologies and health sector in the sphere of critical care and pandemic response.

Viral Transport System

HiViral™ Transport Kits

Considering COVID-19 pandemic and increasing global demand of Viral Transport Media, HiMedia has introduced a new format with **1.3 ml medium** in each tube

Manufactured in GMP, ISO 13485 and ISO 9001 Certified facility. CE Marked for IVD (98/79/EC)

- Enhanced Viral Recovery
- Validated Performance
- Globally Validated Formats
- Assured Accuracy
- Improved Throughput
- Global Recognition

Curb the spread of the corona virus

With free and open access to Praj technology

Now with plant solution

Understanding the seriousness of the fight against the virus and in response to the appeal by health ministries, Praj is happy to offer free and open access to its hand wash sanitizer (HWS) technology solution in line with WHO guidelines. Praj's know-how and engineering package is available on the website at www.praj.net/praj-sanitizer-technology/

Technology package

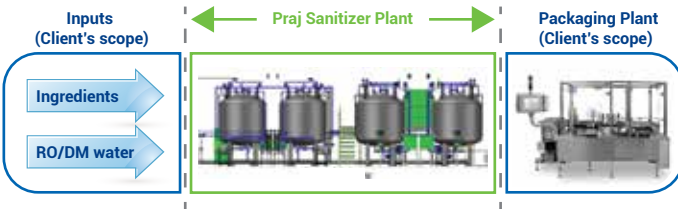

Engineering Package

Manufacturing Plant

Use of high quality hand wash sanitizer (HWS) is an effective measure to control the spread of deadly Corona virus, and the (HWS) market is experiencing exponential demand globally. Following the guidelines issued by the World Health Organization, the formulation in (HWS) must have at least 80% alcohol which will neutralize the virus and prevent its spread. The (HWS) can be produced from value added processing of alcohol made in distilleries and bottling plants.

Praj HiPurity Systems is a wholly-owned subsidiary of Praj Industries Limited, India. Praj HiPurity is a leading supplier for plant and machinery meant for Pharma, Biotech, Cosmetics & Personal Care across the globe for over 3 decades.

PHS is geared up to manufacture and supply modularized solution to manufacture (HWS) on a fast-track basis. PHS will also provide support and technical assistance in bottling plant setup, if required.

Inputs Requirement for 5KLPD HWS plant (50,000 bottles of 100 ml each)

Raw Material	Quantity in Itr/Day
ENA/Pharma grade Alcohol containing min. 96%v/v	4200
Hydrogen Peroxide, 30% v/v	212 - 225
Glycerol, 98%	75 - 87
DM / RO water	550 - 565
Electricity Operating for Praj Scope	15-20 Kwh
Cooling water	As per Process.

Product Hand Wash Sanitizer (HWS) Formulation

Component	Unit	ENA Grade Limit
Ethanol content	% v/v	83.33
Hydrogen Peroxide	% v/v	4.17
Glycerol	% v/v	1.45
RO/DM Water	% v/v	11.05

Praj HiPurity Systems is an established supplier to-

- Leading player in cosmetics, personal care, FMCG.
- Top 100 pharmaceutical manufacturers in India.
- Leading MNC's in Pharma

Praj HiPurity Systems has to its credit 100+ USFDA/WHO approved installation

Our team of experts will be pleased to offer remote assistance in the engineering and commissioning of the sanitizer production facility, on requests from you.

Ayu Devices is a startup spun out of BETiC IIT Bombay and is incubated at SINE IIT Bombay. The company has innovated India's first indigenous AI enabled Digital Stethoscope which can amplify, record, share and visualize the heart and lung auscultations. Currently it is helping the doctors who are fighting against COVID-19 to maintain doctor patient distancing using its Bluetooth enabled stethoscope. Doctors can take the auscultations even by maintaining a distance with the patient through the wireless module and Ayu Share app. The doctors can make use of the amplification feature of its stethoscope which will enable them to hear clear wheezes and crackles in COVID patients.

Confederation of Indian Industry

125 Years: 1895-2020

The Confederation of Indian Industry (CII) works to create and sustain an environment conducive to the development of India, partnering industry, Government, and civil society, through advisory and consultative processes.

CII is a non-government, not-for-profit, industry-led and industry-managed organization, playing a proactive role in India's development process. Founded in 1895 and celebrating 125 years in 2020, India's premier business association has more than 9100 members, from the private as well as public sectors, including SMEs and MNCs, and an indirect membership of over 300,000 enterprises from 291 national and regional sectoral industry bodies.

CII charts change by working closely with Government on policy issues, interfacing with thought leaders, and enhancing efficiency, competitiveness and business opportunities for industry through a range of specialized services and strategic global linkages. It also provides a platform for consensus-building and networking on key issues.

Extending its agenda beyond business, CII assists industry to identify and execute corporate citizenship programmes. Partnerships with civil society organizations carry forward corporate initiatives for integrated and inclusive development across diverse domains including affirmative action, healthcare, education, livelihood, diversity management, skill development, empowerment of women, and water, to name a few.

India is now set to become a US\$ 5 trillion economy in the next five years and Indian industry will remain the principal growth engine for achieving this target. With the theme for 2019-20 as 'Competitiveness of India Inc - India@75: Forging Ahead', CII will focus on five priority areas which would enable the country to stay on a solid growth track. These are - employment generation, rural-urban connect, energy security, environmental sustainability and governance.

With 68 offices, including 9 Centres of Excellence, in India, and 11 overseas offices in Australia, China, Egypt, France, Germany, Indonesia, Singapore, South Africa, UAE, UK, and USA, as well as institutional partnerships with 394 counterpart organizations in 133 countries, CII serves as a reference point for Indian industry and the international business community.
